

bachmaier® presents new hearos in-ear models for musicians - Perfect fit. Perfect sound.

***Bischofswiesen, 25 July 2024.* bachmaier, a leading manufacturer of customized earmolds for special applications, is proud to present the relaunch of its hearos brand. The new hearos 35, hearos 33, hearos 22 and hearos 22mini in-ear models set new standards in terms of sound quality and wearing comfort, especially for musicians. Innovative 3D printing techniques are used to optimise the positioning of drivers and sound channels, guaranteeing a perfect sound experience.**

Customized for perfection

Perfect sound is crucial for professional musicians. The new customized hearos In Ears from bachmaier not only offer an optimal fit, but also an unrivalled sound experience. Every nuance, every voice and every instrument is reproduced with crystal clarity, taking rehearsals, concerts and recordings to a new level.

The new models at a glance

hearos 35 – 3-way system with 5 drivers

Studio sound quality on the go. With uncompromising clarity and precision, this model authentically reproduces every musical nuance. The lively sounding flat frequency response captures every note without distortion, as if you were in a recording studio.

hearos 33 – 3-way system with 3 drivers

The hearos 33 model impresses with rich bass, balanced mids and crystal-clear highs. It brings every musical nuance to life – regardless of genre or style.

hearos 22 – 2-way system with 2 drivers

Specially developed for the stage, the hearos 22 offers outstanding precision and depth of sound. With one woofer and one tweeter driver, it delivers a rich, voluminous sound - ideal for stage musicians.

hearos 22mini – 2-way system with 2 drivers

Despite its compact design, the hearos 22mini impresses with a crystal-clear sound image that comes close to that of the hearos 35. The carefully tuned bass complements any style of music and enables outstanding transparency and speech intelligibility, ideal for all sound lovers – even those with smaller ear canals.

Innovation and craftsmanship for ‘next level sound’

Thanks to state-of-the-art production techniques and exclusive sound engineering, the new hearos models take sound to a whole new level. With precise 3D modelling and advanced printing technology, the optimal placement of the drivers and the ideal length of the sound channels are achieved, creating a premium sound. ‘Our innovative 3D printing technology enables perfect positioning of the drivers and sound channels, resulting in an unrivalled sound experience. Musicians will hear every nuance

of their performance crystal clear – exactly as it should be.’ Michael Haider, hearos Product Manager at bachmaier. This carefully matched combination of drivers and precise positioning ensure the perfect sound curve that bachmaier has defined for itself.

Individuality in ‘hype colours’

All hearos models are available in thermo-flex or acrylic. The trendy colours smoke-grey, transparent and black are available for the shell. In addition, there are 57 colours for the faceplate design and 15 colours for the logo. bachmaier also offers the option of laser-cutting strap logos and professionally implementing almost all individual wishes, so that every pair of hearos is unique.

New design, same passion

With a fresh design concept, the company has completely overhauled the brand's logo, colours and font. The passion for music and premium products is now even more evident. The new hearos In Ears are perfectly tailored to the needs of musicians.

Hearing innovations from the Alps

bachmaier GmbH, based in Bischofswiesen, is a developer, manufacturer and service provider for hearing-related products. With a total of 55 employees, the company has been developing and producing customised products for the hearing aid industry, the hearing protection sector and the music industry for over 30 years. bachmaier[®] now has production facilities in Germany and Hungary and supplies professional equipment to acousticians, hearing protection manufacturers and earmould laboratories throughout Europe.
