

Perfect companion for motorcycling

Ramsau, 11.06.2019. The company bachmaier® has developed a hearing protector for motorcyclists that reliably attenuates wind and driving noise. True to the motto: Feel the wind, don't hear it!

Thanks to the integrated filter, disturbing or harmful frequencies of wind and driving noises are reliably attenuated. The warning signals in road traffic, the voice of the pillion passenger and - very important - the sound of the engine remain clearly perceptible. Riding at high speed, through long tunnels or on the highway thus becomes much more pleasant. With the bachmaier® helmet, you can fully enjoy the fun of riding and arrive at the end completely relaxed - without subsequent ringing in the ears or headaches.

The bachmaier® helmet is custom-made exactly according to the shape of the ear. As a result, it is hardly noticeable and fits like a glove in the ear. The use of soft silicone guarantees a pleasant wearing sensation: no pressing and no feeling of being closed off. A small handle allows the hearing protector to be inserted and removed quickly and easily. The hearing protection is tested according to EN 352-2 and approved for road traffic. All bachmaier® hearing protection products are available from hearing aid acousticians.

bachmaier®, based in Ramsau (Berchtesgadener Land), is a developer, manufacturer and service provider for products related to the ear. With a total of 55 employees, the company has been developing and producing custom-made products for the hearing aid industry, the hearing protection industry and the music industry for almost 30 years.
