

Neoprene for the ears

Ramsau, 08.07.2019. The company bachmaier® has developed a hearing protection for all small and big water rats that keeps sensitive ears dry. The bachmaier® splash is the ideal companion for swimming, kiting, surfing, sailing, splashing and showering. "With our hearing protection, you can enjoy the summer without having to forego the refreshing water," says Fabian Kubicke, Managing Director of bachmaier®.

The soft, buoyant silicone seals the ear, including the auricle, and prevents water and bacteria from entering the ear canal - whether at the seaside or in the swimming pool. Infections and inflammations of the inner ear can thus be prevented. The hearing protection is also suitable for children with tympanostomy tubes.

The bachmaier® splash is precisely adapted to the individual ear shape using an impression. As a result, it is hardly noticeable and fits like a glove in the ear. The use of soft silicone guarantees a pleasant wearing sensation: no pressing and no feeling of being closed off. The bachmaier® splash hearing protection is available from hearing aid acousticians.

bachmaier® - based in Ramsau (Berchtesgadener Land) - is a developer, manufacturer and service provider for products related to the ear. With a total of 55 employees, the company has been developing and producing custom-made products for the hearing aid industry, the hearing protection industry and the music industry for over 30 years.
